

NINE OF THE WORKS OF THE MOST EMINENT DUTCH PAINTERS OF THE SEVENTEENTH CENTURY

"Oh, I've heard much worse at our house," Leilani assured them. "Old Sinsemilla fancies herself an artist." "Dear God," Micky whispered, "what am I going to do?". "condemned men or something?". "I hope they're not going to start shooting each other up here. It would be pretty scary in orbit. They could decompress the whole ship." With the hum of the fan and the noise of the running water as cover, she did what she had never done in. Just then, the door opened noisily, and several loud voices drowned out the conversations in the coffee shop. Colman recognized three faces from B Company, Padawski--a tall, wiry sergeant with harsh, thin lips and hard, bleek eyes set in a long, swarthy face--and two corporals whose names didn't come immediately to mind. They had been drinking, and Padawski could be mean at the best of times. Colman's earlier friendship with Anita had developed at a time when she had taken to staying close to Colman and Hanlon because Padawski had been pestering her. Colman could look after himself when the need arose, and Hanlon, besides being the sergeant in charge of Second Platoon, was a hand-to-hand combat instructor for the whole of D Company, and good. The combination had. "Tell it to Merrick," Fallows said, making an effort ~lot to show the disapproval that he felt. Talking that way betrayed a sloppy attitude toward engineering. Even if they had only three weeks to go, there would still be no excuse not to fix a piece of equipment that needed fixing. The risk of catastrophic failure might have been vanishingly small, but it was present. Good practice lay with reducing possibilities like that to zero. He considered himself a competent engineer, and that meant being meticulous. Walters had a habit of being lax about some things--small things, admittedly, but laxness was still laxness. To be ranked equally irked Fallows. "Log change of watch duty, Horace," he said to the grille on the console. "Officer Fallows." "Some of the Mayflower II's modules have sky-roofs with steel outer shutters, don't they," Kath said. By the time Mrs. Sharmer had left his office at the end of that first meeting, Noah's determination to off the flashlight. Holds his breath. Little snot, Jay thought to himself and turned the page. The next section of the book began with a diagram of the Centauri system which emphasized its two main binary components in their mutual eighty-year orbit, and contained insets of their planetary companions as reported originally by the instruments of the Kuan-yin and confirmed subsequently by the Chironians. Beneath the main diagram were pictures of the spectra of the Sunlike Alpha G2v primary with numerous metallic lines; the cooler, K type-orange Beta Centauri secondary with the blue end of its continuum weakened and absorption bands of molecular radicals beginning to appear; and MSe, orange-red Proxima Centauri with heavy absorption in the violet and prominent CO, CH, and TiO bands. dealership to which it should be delivered. "Tomorrow morning's soon enough. Better not send anyone." "Abaht ten minutes," the steward said. "I'm supposed ter collect it next door any time nah." In the background, one of the soldiers was stripping off his blouse and unbuckling his belt. Sirocco climbed back onto the platform to stand in front of the sketches that he had been using earlier, and gazed around for a few seconds while he waited for everybody's attention. "Well, you'll all be pleased to hear that our resident larceny, counterfeiting, and code-breaking expert has proved himself once again," he announced. "Phases one and four appear to be feasible, as we discussed." To one side and below-the platform, Stanislaw turned with a broad, toothy grin and clasped his hands above his head to acknowledge the chorus of murmured applause and low whistles, rendered enthusiastically, but quietly enough not to attract undue attention to the block at that time of the. "Aha" Merrick seemed more satisfied. "I certainly don't want my name going on record associated with something like this." His statement said as clearly as anything could that Fallows wouldn't do much for his future prospects by allowing his own name to go into such a record either. Merrick screwed his face up as if he were experiencing a sour taste. "Low-echelon rabble trying to rise above themselves. We've got to keep them in; their places, you know, Fallows. That was what went wrong with the Old Order. It let them climb too high, and they took over. And what happened? They dragged it down-civilization. Do you want to see that happen again?". On the other side of the fire-door, Bernard dropped his tools and ran back to the front lobby of the Cominunications Center, praying that the alarm hndn't been raised from there. Hanlon and Stanislaw were waiting outside the entrance with a handful of the others. Just as Bernard arrived, Harding and the first contingent of the staff entrance group appeared from a side-corridor, closely followed by Maddock and the main party with two wounded being helped. Hanlon speeded them all on through into the Communications Center, and the security door crashed shut moments before heavy boots began sounding from the stairwell nearby. As it was no doubt a domestic mouse, favoring hearth over field, the beastie had most likely hidden. He can only imagine the daunting quantity of energy required to be Donella, the waitress whose his in Congress, and that they might see more long-term profit in betraying her than in serving her honestly. "Everyone knows they won't. The whole thing is obviously a device to remove them under a semblance of legality. It's a thinly disguised deportation order." Jay stood up and left the room quietly. Bernard followed him curiously with his eyes for a few seconds, then looked back at Pernak. "But it's a hell of a thin case for shipping everyone off to Iberia, isn't it? And besides, if you're right, then I'd have thought the best place to stay would be right here-all mixed up together with the Chironians. That way nobody's likely to start throwing any big bombs around, right?" He turned his head to grin briefly at Jean. "I think Jerry made my point." .to Sundaes on Wednesdays." "You turning yourself loose?" Rickster asked. "Yeah. Yeah, I'm leaving." Micky leaned forward from the angled back of the lounge chair. "Leilani?". Stormbel gave him a contemptuous look. "How much of your Army is left?" he asked. "Almost all of it is on the surface, and the officers commanding the key units are already with us. Besides, we control the ship, which is the most important thing." .player was olive-skinned with Mediterranean features. "Oh... she's very good," Bernard said. concern for the insect be addressed seriously.. "When we were discussing the Continuity of Office clause," Kalens prompted.. "I don't know," Brad replied. "I haven't been in on it at the top level. But it's

medium-to-long range, and for some reason it has to be synchronized with the ship's orbital period." "That's a word I never know whether to be embarrassed about." Merrick's pained expression deepened into a frown. "Tch tch, that's inexcusable. How unfortunate. Let me see now-I can't remember exactly when it was but you were on duty. That was why I couldn't include you at the time." That was an outright lie; Bernard had been there on his day off, with Jay. "But anyway, we can soon put that straight. You'll find the place fascinating. A woman runs most of the primary process- a remarkable lady- I can promise you some interesting company as well as interesting surroundings. What I'd like you to do is arrange something with Hoskins for as soon as possible. I'm afraid I'll be tied up for the next couple of days." Stormbel fired. Ramisson staggered to an outburst of horrified gasps and then collapsed to lie groaning in the aisle. Stormbel replaced his gun calmly in his holster, then raised his hand to address the guards. "Remove that man, and see to it that he receives medical attention." Two SDs moved forward, hoisted Ramisson up by his armpits, firmly but without undue roughness, and carried him out while two others opened the doors then closed them again and resumed their positions..use..when he worked at the university, but I can't rely on him to educate me now, because it's impossible to..and holding Celia's handkerchief to her face with the other. The grieving widow paused to look around the room, nodded once to the matron, and moved toward the door. They crossed the lounge and waited while the guard retrieved the luggage, and then the three of them rejoined the two guards outside the suite door. The party then reformed and began descending the stairs. -.The inverted logic that had puzzled him had not been something peculiar to the military mind; it was just that the military mind was the only one he had ever really known. The inversions came from the whole insane system that the Military was just a part of-the system that fought wars to protect peace and enslaved nations by liberating them; that turned hatred and revenge into the will of an all benevolent God and programmed its litanies into the minds of children; that burned and tortured its heretics while preaching forgiveness, and made a sin of love and a virtue of murder; and which brought lunatics to power by demanding requirements of office that no balanced mind could meet. A lot of things were becoming clearer now as the Chironians relentlessly pulled the curtain away..Western medicine, which she despised. "We're trusting the Chironians too much. I still say they could have strength that they're not showing yet. We could be exposing those civilians to all kinds of risks--terrorism, provocations. "I'm beginning to miss being thrown out in the middle of the night. How's your handsome sergeant these days? You haven't finished with him, have you?".Sirocco had already known the story, but it would have been out of order to say anything. Only a strong leader with the power to act decisively would stand a chance of solving the problems, and the Mayflower II's constitution was designed to prevent anyone's becoming one. Its spirit was an anachronism inherited from antiquity when a newly rounded Federation had sought to guard itself against a renewed colonialism, and the governing system embodied that spirit quite effectively. That was the problem..Pernak waited for a moment longer, then put down his fork and leaned across the table. "On Chiron, wealth is competence!" he said. "Haven't you noticed--they work hard, and whatever they do, they do as well as they know how--and they try to get better all the time. It doesn't matter so much what they do as long as it's good. And everybody appreciates it. That's their currency--recognition, as you said . . . recognition of competence." He shrugged and spread his hands. "And it makes a lot of sense. You just told us that's what everyone wants anyway. Well, Chironians pay it direct instead of indirectly through symbols. Why make life complicated?".The bureaucrats who had mismanaged the sprawling politico military machine that had come to dominate the North American continent had been unable or unwilling to recognize his worth and dedication while they heaped honors and favors on Sons of spineless sycophants and generals' blue-eyed prot?g?s groomed to the movie image at West Point, and he felt no compassion for them now as the laser link from Earth brought news of nuclear devastation across the length and breadth of Africa, and of titanic clashes between armies in Central Asia. I've told you how I grew up. What was it like with you?".Borftein licked his ups and thought frantically. As Stormbel! was about to repeat the order to clear the room, Borftein looked at Sterm, closed his eyes for a moment, and then raised a hand and shook his head. Sterm looked at him questioningly. "I m not sure I even know what's happened," Borftein said. "It's been too sudden. Just what do you think you're going to do?"
