Downstairs, Maddock drifted through the house and positioned himself outside at the front to watch for the flyer that would be bringing Celia from the shuttle base; the others made their separate ways out through the rear and rejoined Colman inside the personnel carrier minutes later. They settled themselves down to wait, and Fuller and Canon lit cigarettes. "Still think it'll go okay, Sarge?" Stanislaw asked. "I could do a quick hair-job in there." He had brought the things with him, just in case..university-trained doctor..dog's neck, Together they wait, alert..mystery, and moment.. "LCP's standing by and ready to fire," another voice reported.. "Isn't that a Hawaiian name?" Micky asked.. "Then invoke the security provisions," Borftein said, shifting in his chair from weariness with the whole business. "It's a security matter, isn't it? The Chironians have left it to us by default, and it's their security at stake as well as ours. The Pagoda's only two years away. Somebody's got to take the helm in all this." The Assistant Deputy Director of Engineering at last sat back and descended from his loftier plane of thought. "Ah, yes, Fallows." He gestured toward the screen he had been studying. "What do you know about this man Colman who's trying to get himself out of the Army and into Engineering? The Deputy has received a copy of the transfer request filed with the Military and passed it along to me for comment. It seems that this Colman has given your name as a reference. What do you know about him?" The inclined chin and the narrowing of the Gothic eyebrows were asking silently why any self-respecting echelon-four engineering officer would associate with an infantry sergeant.. "Aw, cut it out, Hoover," Rastus told the robot. "These people have only just arrived. They've got more than enough to do." He looked at the Terrans. "This is Hoover. He runs the place. Don't pay too much attention or you'll end up buried in junk up to your eyes." Obviously something unusual was going on. Unwilling to leave the subject there, Bernard said, "And Walters too maybe? Perhaps he could use a refresher too,".Chapter 16."What are the gifts still talking about in there?" Bernard asked..motor home. Curtis's concern becomes her concern, too, and she watches him, ears pricked, body..Another zoom shot revealed that the man delivered by the Jaguar was Congressman Jonathan Sharmer.. "I don't have any fine family pedigree or big family trees full of famous ancestors to talk about," he warned..Bernard threw up his hands in exasperation. "Well, hell, let's say because they're just plain crazy. They don't need any reason. Never mind why, but let's say it's happened. What do you do?" "I was almost twelve when it ended." Marie, who had been exploring the house, emerged from the elevator. "The basement is huge!" she told them. "There are all kinds of rooms down there, and I don't know what they're for. I could have my own room to draw things in. And did you know there's another door down there that leads out to a tunnel? I think it might go through to where the .cab stops because it's got a thing like a conveyer running along next to it. Perhaps we needn't have carried all those things over and in through the front door at all". chin, he takes inspiration from a movie: "The name's Old Yeller."..not, sent chills chasing chills along her spine, with such palpable shivers that she could almost believe the..anger, and so she drank now in the service of Leilani..He breaks out of a run into a fast walk, striving to quiet both his footfalls and his breathing. Colman drank up and left..witnesses.."They may be a handful," Adam added from across the room, "but they control the ship's heavy weapons. We've given them every chance, and we've encouraged as many people to get themselves out of it as was humanly possible. Our whole world is at stake. Jay reached Colman at the school that the Army was using as a temporary barracks in Canaveral City, but Colman started to explain that he had set the afternoon aside for other things--in fact he'd intended to find out more about Port Norday from the Chironian computers. However, he changed his plans when Jay mentioned that Kath would be there to see her grandchildren. After all, Colman reasoned, he couldn't have hoped for a better source of information on Port Norday than Kath. As Hanlon was off duty, Colman had invited him along too.."Maybe you should try looking at it their way," Colman said..Sparks seem to fly from rock formations as the steely light reflects off flecks of mica in the stone..fight. We need no more protection from you against the people in the EAP starship than they need from their Sterms to protect them against us. We have no need of that kind of strength. Is it strength for neighbors to fortify their homes against each other, or is it paranoia? You must feel very insecure to wish to fortify an entire star system." Sirocco tossed up a gauntleted hand as if the answer were obvious. "Guys who don't like it but have to do it get mad. "Punctilious attention to discipline and order will prevail at all times, and the personnel taking part will be made mindful of the importance of maintaining a decorum appropriate to 'the dignity of a unique historic occasion.' That means no ventriloquized comments to relieve the boredom, Swyley, and the best parade ground turnout you ever managed, all of you. 'Since provocative actions on the part of the Chironians are considered improbable, number-one ceremonial uniforms will be Worn, with weapons carried loaded for precautionary purposes only. "You ..." Her voice caught somewhere at the back of her throat. "You knew this was going to happen- Howard, Phoenix, everything. You were manipulating all of them from the beginning, even Wellesley. You knew what would happen after the landing but you endorsed it..". "Why don't you piss off," he growled at last.."Who said anything about them? Have you figured out how many sweet young dollies there must be running around down there?" Sirocco chuckled lasciviously over the intercom. "I bet Swyley has a miraculous recovery between now and when we go into orbit." Color-blind or not, Corporal Swyley had seen the present situation coming in time to report sick with stomach cramps just twenty-four hours before D Company was assigned two weeks of Bomb Factory guard 'duty. He was "sick" because he had reported them during his own time; reporting stomach cramps during the Army's time was diagnosed as malingering..lasers, slim grenades, handcuffs. He couldn't see any reason why travel shouldn't come free on Chiron, just like everything else, and wondered what kinds of connections could be made from Port Norday to the more remote reaches of the planet. Interesting. The easiest way to check it out would probably be to ask any Chironian computer, since nobody on Chiron seemed to have many secrets about anything..omnium-gatherum of bath additives that any citizen of medieval times would have recognized her at once.Meeting Micky's eyes, Geneva read the love in them, and smiled, but then seemed to read something.Adam seemed to think about it for a long time. "No ..." he said slowly at last. "We're on our own on a grain of dust somewhere in a gas of galaxies. Inventing guardian angels for company won't change it. Whether we make it or not is up to us. If we mess it up, the universe out there won't miss us." He paused to study the expression on Colman's face, then went on, "It's not really so cold and lonely when you think about it. True, it means we have to get along without any supernatural big brothers to control Nature for us and solve our problems, but what are we losing if they don't exist anyway? On the other hand, we don't have to fear all the nonsense that gets invented along with them either. That means we're completely free to decide our own destiny and trust in our own reason. To me that's not such a bad feeling."More than friends, the couple on the TV were as close as Siamese twins, joined at the tongue.."No doubt," Noah said, "they were once troubled youths rescued from a life of mischief, and."Why don't you?".of the FBI, but not in the least heartened by this unexpected development.."But who decides who works here? "I m not sure I even know what's happened," Borftein said. "It's been too sudden. Just what do you think you're going to do?" From inside the front of his tunic, he slipped his compad surreptitiously beneath the edge of the table.."maybe you'll realize your palm-shaded terrace isn't in Heaven."..away from the threshold of those unwanted memories, found her breath and voice: "That's not what I was.The relief detachment from B Company marched from the exit of the shuttle to take up positions in from of the ramp, and Sirocco stepped forward to address the advance guard. "Morale is high now that we're nearly there, and I don't want to spoil it. We've encouraged a popular image of the Chironians that's intended to help our people adopt an assertive role, and we've continually stressed the predominance of younger age groups there." He shook his head. "Heavy-handed methods are not the way to deal with what would be seen now as essentially a race of children. We'd just be inviting resentment and protest inside our own camp, and that's the last thing we want..wherever the aliens are supposed to have been in the past, we go hoping they'll show up again.
