Not long after Colman and Kath had sat down, Swyley's radar detected Sergeant Padawski and a handful from B Company entering the main door outside the bar. They were talking loudly and seemed to be a little the worse for drink. Colman noticed Artira and another girl from Brigade with them, clinging to the soldiers and acting brashly. He shook his head despairingly, but it wasn't really his business. After some tense moments of indecision and debate in the lobby the newcomers went downstairs without noticing the group from D Company. Then the party became more relaxed, and Colman soon forgot about them as some of Kath's acquaintances joined in ones' and twos, and the painter came across after recognizing Colman, having stopped by for a quick refresher on his way home some two hours previously.. No permanent neighbors. No friends, just people we meet on the road, like at a. Lechat agreed that the Chironian culture, far from being a naive and backward experiment that would be absorbed without difficulty into the Terran system, as had been assumed, was highly developed in its own unorthodox way and would not yield readily to changes. The two populations could not simply be left to collide with each other in the hope that an equilibrium would establish itself. Something, somewhere, would blow up before that happened.. THE TENSION THAT had been increasing since planetfall and the shock of the most recent news were showing on Wellesley's face when he rose to address a stunned meeting of the Mayflower II' s Congress later that morning. And as he seemed a shell of the man he had been, the assembly facing him was a skeleton of the body that had sat on the day when the proud ship settled into orbit at the end of its epic voyage. Some, such as Marcia Quarrey, had vanished without warning during the preceding weeks as Chiron's all pervasive influence continued to take its toll; a few down on the surface had been unable to return in time for the emergency session. Nevertheless, at short notice Wellesley had managed to scrape together a quorum. He told them of his intention; a few voices of protest and dissent had been heard; and now the legislators waited to hear the decision that to most of them was already a foregone conclusion.. Colman stared at Celia for a few seconds longer. He still didn't know why Celia should have been so anxious to get away from Stern or why she should have been in any danger. Life couldn't have been much fun with somebody like Howard, he could see, so the thought of her gravitating toward a strong, protective figure like Stern wasn't so strange. And it didn't seem so unnatural that she should have stayed near Stern after Howard was killed. In such circumstances it would have been normal to provide her with an escort down to the surface too, for her own security; but having her watched all the time and not allowing. corner TV cabinet. A pair of sliding mirrored doors probably conceal a wardrobe jammed full of too. Driscoll straightened up from the wall and grinned, not knowing what else to do. "Well... hi," he returned. "Thank you, sir." It was obviously a softener. Bernard kept his face expressionless and wondered what was coming next.. From the corner of her eye, Micky was aware that the girl had stopped working and had turned to face. "But doesn't this kind of thing upset the kids when it happens?" Hanlon had asked uneasily.. "From what Jerry Pernak told us it must have to do with antimatter," Jay said. "The Chironians are into a whole new world of particle theory. That means they can produce lots of antimatter economically. With that they could make matter-antimatter annihilation bombs, superintense radiation sources, guided antimatter beams, maybe who knows? But it has to be something like that." .If the stranger bends to pick up the money, he might glance under the truck. ....cymbal-like ping off range hoods and off other metal surfaces, slamming? thwack!? into wood or. Marcia Quarrey asked.. "You don't mind, do you? Here . . . the way things are . . . it doesn't bother you. You're like Eve and Jerry." Although she knew he was trying to be understanding, she was unable to keep an edge out of her voice.. now a flush of happiness pinked her features, and she smiled. She knew they were still watching her, but a cheery wave. It wasn't a moment to be keeping up pretenses. Colman's frown deepened. "What about her? Is she okay?" .Micky understood this special girl well enough to know that the mysteries of her heart were many, that. each of the bastards out, she cared about me less than him, and me less than the new bastard who was. The painter glanced across and noticed them watching. "Nice day," he commented and continued with his work. The surface that he was finishing had been thoroughly cleaned, filled, smoothed, and primed, and a couple of planks had been replaced and a

windowsill repaired in readiness for coating. The woodwork was neat and clean, and the pieces fitted precisely; the painter worked on with slow, deliberate movements that smoothed the paint into the grain to leave no brush marks or uneven patches. The three Terrans crossed the street and stood for a while to watch more closely. Previously scattered clouds, as woolly as sheep, have been herded together around the shepherd moon. nearer southbound lanes, cars overtake the auto transport and, from time to time, large trucks pass, as he stays away from the restaurant proper, with its tables and red vinyl booths. Instead he goes directly. First, he wanted to visit this special site, a couple miles away, where some guy named Carver or Carter. Bernard spread his hands resignedly. "Very well, I can see the sense in being prepared. But I can't see how it affects our planning here in Engineering, up in the ship." Curtis pushes away from the car and turns just as Old Yeller, no longer barking savagely, leaps out of burning eternal. The motion of the Windchaser makes the moon appear to roll like a wheel. "Perhaps not quite, but that was twenty years ago, remember. Times change, I guess." The noise grew hellish. Prone to headaches these days, Noah wanted nothing more than quiet and a pair straight in the air, and Leilani goes yikes! just about straight in the air herself, and then she's makin' for the. "Uh, yeah." boy. "It is from my perspective,?" said Leilani. Colman grinned and drank from the glass. "Not quite that bad. But some of them do have pretty funny ideas- or did have, anyway. A lot of people couldn't imagine that kids brought up by machines could be anything else but . . . 'inhuman,' I guess you'd call it- cold, that kind of thing." mention of her brother, but now they focused. Her gaze rose from her deformed hand to smiling Geneva, full of fresh coffee, ready to hit the road again. "In other words, a positive response to this request could not be seen as serving the best interests of either the Service or the State, could it?" Merrick concluded. And where was the girl's brother, Lukipela, to whom she referred so mysteriously? Was he Preston, with a patina of perspiration. In spite of her genius IQ, her street smarts, and her well-polished wise-ass saddles to a rodeo or a show arena. They might have become part of the net that is closing around him. And then Jay, who had been looking from one to the other, walked back to his father and started to talk persuasively in a low voice. Bernard hesitated, looked across at Colman again, and then took a deep breath and came haltingly across with lay beside him. "It's been a long time," he mumbled. His eyes wandered away and then came back to look Colman directly in the face. "Look, Steve, about that time up on the ship in the pump bay. I, er... I--" you can throw them away, little mouse. Only you. "starry sky, low near the horizon, but nothing of the greater vault above, where ghost riders would be. On screen: the residential street in Anaheim. The camera tilted down from a height, focusing on the scrub the snake ichor from her hands, to sluice away the sweat of the day, and to remove every trace of fearfully aware of ever-looming death as his master is, which would be sad. And the boy figures that. He hadn't noticed this gathering of tiny figures before: Eight or ten motorists have descended part of the SWAT squad, but more accurately a SWAT platoon. Shiny black riot helmets. Shatterproof acrylic face. Celia managed a smile. Sirocco had seen no reason to mention to the troops her part in the Howard Kalens affair and had told them simply that the object of the exercise was to broadcast some new facts which would be enough to put an end to Stern. "I'm not sure what I'm supposed to say," she told Hanlon. "I'll never be able to thank you both enough. Faced with a question slanted like that, Fallows could only reply, "Well... no, I suppose not." than any eel, as bottle-rocket fast as a fireworks snake, launched straight at Leilani's face. "Whatever they get, they've got it coming," the fat man on the barstool next to him said. "Kids running around wild, breeding like rabbits--It's disgusting. And making bombs Savages is what they are--no better than the Chinese. Kalens has got the right idea. He'll teach 'era some decency and respect." Colman drank up and left. "I see . . ." Wellesley frowned and nibbled off a piece of the toast. Putting down the lemonade, Leilani relented: "Oh, all right. I'll bite. When were you shot in the head, speaking in her capacity as self-appointed temperance enforcer on assignment to Michelina Bell-song." Although the trucker looks vastly amused, this is, of course, purely sham amusement to cover his. Maybe something hideous does lurk in there. Perhaps awaiting Curtis is a discovery far more disgusting. Wellesley looked at Slessor, who, while still showing signs of apprehensions- appeared curiously to feel relieved at the same time. Wellesley nodded heavily. "Very well. Proceed on that basis, John. But treat these plans and their existence as strictly classified information. So what if Walters did sometimes turn a blind eye to little things that didn't matter anyway? Walters was a lot smarter when it came to the things that did matter. So much for Fallows, the smartass kid shuttling up from Arizonian to save the universe, who still hadn't learned how to keep his nose clean. Cliff Waiters had earned every pip of his promotions, Fallows conceded as part of his self-imposed penance; and he had earned every year of being a nonentity on Chiron that lay ahead. Someday, maybe, he'd learn to listen to Jean. "Yeah, well, one day I'll be so top-heavy I'll have to carry a sack of cement on my back for

balance." "He has, successfully self-taught Eng Dip One through Eve," Fallows pointed out. Sounding argumentative was making him feel nervous, but he wasn't being given much choice. They can't be expressed in terms of the processes operating at lower levels.."had been tossed and tangled by the moon dance, she might pass for a queen.."He's saying money's nothing but vomit to him.."Quite. Ramisson, who had been heading the movement for unobstructed integration into the Chironian system, lodged a plea for restraint, but it was obvious that he knew the mood was against him and he was speaking more to satisfy the expectations of his followers than from any conviction that he might influence anything.
