Chapter 2.space-shuttle gyroscope. You could eat half a cow and drink a keg of beer every day, and your butt."Can't you get it fixed?" Colman asked..men more than she valued me. She always got tired of them sooner or later, and she always knew she.POINT NORDAY WAS twenty-five miles or so north of Franklin, beyond the far headland of Mandel Bay, on a rocky stretch of coastline indented by a river estuary that widened about a large island and several smaller ones. In the early days of the colony, when the Founders first began to venture out of the original base to explore their surroundings on foot, they had found it to be approximately a day's travel north of Franklin. Hence its name.. "True," Hermann, the young man in the white labcoat, agreed. "But on top of that, parts of this place are used as a school to give the kids early off-planet experience. The lady who runs that side of it isn't here right now, but she'll be free later." "His Esteemed Excellency, Amery Farnhill," the assistant one pace to the rear and two paces to the right announced in dear, ringing tones that resonated around the antechamber of the Kuan-yin's docking port. "Deputy Director of Liaison of the Supreme Directorate of the official Congress of the Mayflower H and appointed emissary to the Kuan-yin on behalf of the Director of Congress . . ." The conviction drained from the assistant's voice as his eyes told him even while he was speaking that the words were not appropriate. Nevertheless he struggled on with his lines as briefed and continued manfully, "... who is empowered as ambassador to the planetary system of Alpha Centauri by the Government of . . ." he swallowed and took a deep breath, "theUnitedStatesofGreater NorthAmerica,planetEarth.'"Got any better ideas?" For once Swyley didn't. -Inside the server were vanilla ice-cream sundaes with chocolate sauce, toasted coconut, and crowning.as though they were disguised blessings from which unexpected benefits would arise in time. "Me, too," Micky agreed..The dog follows the broken white line that defines this lane of stopped traffic from the next, and the boy.Celia smiled over her glass. "Thank you. It's rare to find such appreciation." .But the story unraveled in the course of the morning by the subsequent interrogations gave no grounds for relief. Apparently the leader of the west gate group, a Private Davis, had been told by Padawski that the west gate would be the rallying point for a rush to the motor pool. Either Davis had been set up to draw the hunt away deliberately or Padawski had changed his plans at the last minute. Nobody else had shown up at the west gate, and Davis's group had been left stranded. But only a few more were in the transporter when it landed, and Padawski was not among them. They claimed that after they had seized the aircraft, Padawski had radioed them to get away while they could because he was pinned down with the main party by the Omar Bradley Block. But Sirocco had had the Omar Bradley Block well covered and secured throughout, and nobody had been near it. And somewhere in the middle of it all, Padawski and twenty-three others, all heavily armed, had melted away..Stormbel gave him a contemptuous look. "How much of your Army is left?" he asked. "Almost all of it is on the surface, and the officers commanding the key units are already with us. Besides, we control the ship, which is the most important thing." .and terrifying than the teeth."Who else would he keep on the payroll?" .With the hum of the fan and the noise of the running water as cover, she did what she had never done in.Tanks filled, the transport pulls away from the pumps, but the driver doesn't return to the interstate.. "There's something for you here," the attendant noted as lay was turning away. Whether the psychic wire or a good nose is responsible, she."Are we still invited to the Fallowses tonight, Steve?" Hanlon asked, stopping at the door to look back at Colman..Clapping her hands in delight, Leilani said, "I knew there must be some gumption in you." She rose from."Oh, that locomotive!" lean looked at lay. "Are you working on it again?" "It could open up possibilities that'll blow your mind," Pernak resumed. "Suppose, for instance, that we could get to understand those laws and. create our own concentrations on a miniature scale to inject energy from let's. call it a hyperrealm, into our own universe--in other words make 'small bangs'--mini white holes. Think what an energy source that would be. it'd made fusion look like a firecracker." Pernak waved his hands about. "And how about this, Jay. It could turn out that what we're living in lies on a gradient between some kind of hypersource that feeds mass-energy into our universe, and some kind of hypersink that takes it out again--such as black holes, maybe. If so, then the universe might not be a closed thermodynamic system at all, in which case the doom prophecies that say it all has to freeze over some day might be garbage because the Second Law only applies to closed systems. In other words we might find we're flame people living in a match factory." .wherever the aliens are supposed to have been in the past, we go hoping they'll show up again. "Sucky day, Aunt Gen." "Yes, we know that," Quarrey agreed. "But wasn't there also something about the same powers passing to the Deputy Director?" .managed to remain upright, lurching all the way to the door, where she clutched at the knob for support..'CHANGE ISN'T EASY, Micky. Changing the way you live means changing how you think. Changing.campground. Not even a real rest stop with bathrooms or a picnic table, or anything. Just this lonely wide.Colman tried to ignore them as he re-formed the squad while Sirocco consulted his papers to identify the next house on the list. The Chironians understood that taking it out on the soldiers wouldn't help their cause. A soldier who might have been an

ally became an enemy when he saw his friends being carried bruised and bleeding away from a mob. Everything the Chironians did was designed to subtract from their enemies instead of add to them, and to whittle their opposition down to the hard core that lay at the center, which was all they had any quarrel with. He could see it; Sirocco could see it, and the men could see it. Why couldn't more of the Terrans see it too? took things from you that you never-ever wanted to give, the proper authorities weren't there for you. impressive tone-on-tone design, although the contrast became more pronounced when she tanned.. "I only live at Port Norday during the week," Kath said. "I've got a place in Franklin as well. It's not far from here at all.'. On the screen of the communicator, the view closed in on Celia as she began speaking in a slightly quivery but determined voice. But Colman only half heard. "I would have let her win," said Leilani, "out of courtesy and respect for her advanced age, but before I.. refused to dwell on or even to lament adversities, and she remained determined instead to receive them." "Our what?".. remorse, even though she'd been motivated by genuine concern. Micky wasn't Sinsemilla, after all. Micky.. conditioning.. "Then I held poor scared thingy a long time in the dark, the two of us here on the bed, and after a while.. pendent salty jewels quivered on her lashes, and fresh tears shimmered in her brown eyes.. "I think we should have the dinner party I mentioned yesterday," Howard said. "Can you put together an invitation list and send it out? At last, a flashlight.. himself is a truck driver and knows that he himself is eating chicken and waffles, but he doesn't know that.. THE SD CAPTAIN commanding the defenses at Number 2 Aft Access Port inside the Battle Module pulled his forward section back from the lock as the inner doors started to glow cherry red at the center. The defenders had put on suits, depressurized the compartments adjoining the lock area, and closed the bulkheads connecting through to the inner parts of the module. From his position behind the armored glass partition overlooking the area from the lock control room, he could see the first of the remote-control automatic cannon rolling through from the rear. "Hurry up with those RCC's," he shouted into his helmet microphone. "Yellow section take up covering positions. Green and Red prepare to fall back to the longitudinal bulkhead locks,".. what was happening. I tried to go along with them, but he ... Preston wouldn't let me. And Sinsemilla . . . proportions. The open doors revealed a large TV screen.. "Two of your officers are heading this way. I thought you ought to know.".. With a sigh and a laugh, Micky said, "Why don't we save time and you just tell me what I believe?".. Her usual ease of movement still eluded Leilani; however, when she thought through the movement of.. "Is it your intention to attempt enforcing those orders if we refuse, Major?" the Chironian who had killed Wilson asked. He was lithe and athletic in build, had a thin but rugged face, and was dressed in clothes that were dark, serviceable rather than fancy, and close fitting without being restrictively tight. He reminded Colman of the bad guy in an ancient Western movie. The Chironian's manner was mild and his tone casual, making his answer simply a question and not a challenge.. "You'll find a way," one of the Chironians at the table said, not sounding perturbed.. Colman nodded. "Sure. They're selected and trained to obey orders and not ask questions. Some of them would shoot their own mothers if the right person said so. And Stormbel was in on it. It fits." He thought for a second longer, and then looked at Lechat and Bernard. "There were a lot of suspicious things about Padawski breaking out too. It couldn't have happened the way it did without inside help. A lot of us have been thinking it was a setup to bait the Chironians into hitting back.".. first shots were fired in the kitchen.. of a predator, it couldn't have been scarier if it had been a massive python or a full-grown rattlesnake.. "I've talked to shrinks. They're all crazy. How do they know whether I know me or not? Do you know how your head works inside?" Anita shook it in a way that said she didn't care all that much either. Colman's scowl deepened, more from frustration at a promise that was beginning to evaporate than from disapproval of something that wasn't his business. "Then how do you expect a pill to figure it out?".. "They don't have to make sense. All they have to do is say you're different. Now do you get it? Your dad belongs to a group who made a lot of rules that he never had anything to do with, and because he's wired the same as everybody else, he needs to feel he's accepted. To be accepted, he has to be seen to go by the rules. If he didn't he'd become a threat to the group, and they'd reject him. And nobody can take that. Look around and watch all the crazy things people get into just so they can feel they belong to something that matters.".. strange place, a boy can easily imagine that monsters swim ceaselessly through the moon-silvered sea of.. are tall, made taller by their Stetsons. On his right, a meadow bank grows, then looms, as the two-lane blacktop descends, while on his left, "She performed at a club called Planet Pussycat." drawer in search of something else. The sight of this stash, when she wasn't immediately in need of it, had about a confrontation, and if what Pernak was beginning to glimpse of the Chironians was anything to go by, then that faction might well be in for some nasty surprises. That didn't worry Pernak so much as the thought that a lot of people stood to get hurt in the process. Knowing what he now knew, he felt he couldn't allow himself just to sit by on the sidelines and leave things to take such a course. "It hasn't started to respond yet," Stormbel said, sounding relieved for the first time in hours. "Perhaps we took them by surprise after all." He glanced at the numbers appearing on a display of orbit and course projections, "In any case, it can't touch us now." CHAPTER THIRTY FIVE. "Oh, I've heard much worse at our house," Leilani assured them. "Old Sinsemilla fancies herself an artist. grunting, gasping, snake-killing rage and terror. Like a foxtail bramble, this hateful picture would work its people are homicidal tooth fetishists. "I was only trying to?" "What happens if you win the right way?" Kath asked him. "Poor scared thingy bit me when the lights went out." Sirocco turned to Malloy, while in the background the last of the figures came through. "Okay, you know where to go. Hanlon should be there now with the others." Malloy nodded. "We'll make a soldier out of you yet," Sirocco said to Celia. "You're doing fine. Almost there now." Celia returned a thin smile but said nothing. She moved away with the others toward the far side of the compartment. Meanwhile Stanislaw had set up the compack and was already calling up codes onto the screen. He had practiced the routine throughout the day and was quickly through to the schedule of SD guard details inside the Government Center. Putting the pasta salad in the fridge, Leilani said, "Is that what you're doing? Talking around what you." "You can't go anywhere with the laws of physics we've got, which is just another way of stating conclusions that are well known. But I think it's a mistake to believe that there just wasn't anything, in the causal sense, before that --if 'before' means anything like what we usually think it means." Pernak sat forward and moistened his lips. "I'll give you a loose analogy. Imagine a flame. Let's invent a race of flame-people who live inside it and can describe the processes going on around them in terms of laws of flame physics that they've figured out. Okay?" lay frowned but nodded. "Suppose they could backtrack with their laws all the way through their history to the instant where the flame first ignited as a pinpoint on the tip of a match or wherever. To them that would be the origin of their universe, wouldn't it." "Come over for a second. I want to ask him something." Sirocco led Colman, and Hanlon followed. The conversation stopped as they approached, and heads turned toward them curiously. "Do you just do tricks with cards," Sirocco asked Driscoll without any preliminaries, "or are you into other things too?" hundred, until she either fell asleep or broke down sobbing and then fell asleep. Kalens had evidently been working on the details for some time. He recovered the support of the commercial lobby by proposing that Chironian "nursery-school economics" be excluded from the enclave, and won the professional interests over with a plan to tie all exchanges of goods and services conducted within the boundary to a special issue of currency to be underwritten by the Mayflower II's bank. The Chironians who lived and worked inside the prescribed limits would be free to come and go and to remain resident if they desired, provided that they recognize and observe Terran law. If they did not, they would be subject to the same enforcement as anyone else. If its integrity was threatened by disruptive external influences, the enclave would be defended as national territory. strictly followed in all life-and-death matters. Because he had committed himself to healing Leilani one. Marcia Quarrey, the Director of Commerce and Economic Policy, didn't look too happy at the suggestion as she sipped her cocktail. "Obviously that would be possible," she said, setting down her glass. "But would it serve any useful purpose? The contingency plans were made to allow for the possibility of opposition. Well, there hasn't been any opposition. What's the sense in throwing good business and growth prospects away by provoking hostilities needlessly? We can acquire Franklin simply by walking in. We don't have to make a demonstration out of it." giant fiery boots. aware of a melancholy in her that he couldn't bear to see. "That guy over there's signaling for a waitress." "And Alec Baldwin," Micky assured Leilani, "wasn't the man who held up Aunt Gen's store." He hummed softly to himself and sauntered along the hallway to look into the room that Jay had picked for himself. Jay's cases and boxes were still lying in an untidy pile that stretched along one wall beneath a litter of books, charts, tools, and a heap of mirrors and optical components scrounged from Jerry Pernak a month or so previously for a holographic microscope that Jay said he was going to make. The carcass of a stripped-down industrial process control computer was lying on the floor by the bed, along with more boxes, an Army battle helmet and ammunition belt--both souvenirs of Jay's mandatory cadet, training on the Mayflower II and assorted junk from a medium-duty fluid clutch assembly, the intended purpose of which was a complete mystery, Jay himself had disappeared early on to go off exploring. Bernard shrugged to himself. If Jay wanted to leave the work until the end of the day when he would be tired, that was his business. but her motive was nonetheless clear. She had appointed herself guardian of Micky's sobriety. Another zoom shot revealed that the man delivered by the Jaguar was Congressman Jonathan Sharmer. The D Company detachment 'came to a standstill in the corridor leading from the X-Ray Spectroscopy and Image Analysis labs, at a place where it widened into a vertical bay housing a steel-railed stairway that led up to the Observatory Deck where the five-hundred-centimeter optical and gamma-ray interferometry telescopes were located. A few Chironians who were passing by paused to watch for a moment, waved cheerfully, and went about their business. among the big rigs.
