"Well, that's something, anyway," Sirocco said. "Stay there, Bret, and don't let anyone touch anything. I'll get onto Brigade right away. We'll have some more people over there in a few minutes." He returned to Colman. "Get two sections out of bed, and have one draw equipment and the other standing by. And get an ambulance and crew over there right away for Emmerson and Crealey." Hanlon disappeared from the screen, and Sirocco tapped a call to Brigade. "It looks as if the fall-guy has gone down, Steve,". "They're okay," Corporal Swyley's disembodied voice ? whispered from no definable direction. "We're making ourselves look like jerks." "Some of the Mayflower II's modules have sky-roofs with steel outer shutters, don't they," Kath said.. "Regular comm channels are all down, to the ship everywhere. They have been for over an hour," Stanislaw said. "Emergency channels are restricted to priority military traffic." Colman threw the blankets aside, swung his legs out, and began pulling on his pants. "Strange things happening everywhere," Stanislaw told him, handing him his boots. "Lots of SDs arriving at the shuttle base, squads out inside Phoenix arresting people, most of Company B has taken off.. I don't know what it's all about..". "Well, there's something to think about," Cromwell suggested.. Howard Kalens simmered as he listened. Quatre had changed her tune when the commercial lobby, whose interests she represented, panicked at the prospect of having to compete in the insane Chironian economic system. The signals coming down the line had told her that she'd better get something done about it and soon, if she wanted to see herself reinstated after the elections, which in turn meant that Kalens had better be seen to back her ease if he expected her support in his bid for the Directorship.. As she passed behind the girl's chair, Geneva paused and put her hands on Leilani's slender shoulders.. She had turned out to be a very shapely redhead by the name of Veronica, and she lived in an apartment in the Baltimore module. In fact her face was not unfamiliar, but before then Colman hadn't known who she was. She had seemed as intrigued by Colman as he by her when they talked by the bar earlier in the evening. "Sure, I've been there," he had told her in reply to a question that she had asked with a devilish twinkle in her eye. "There aren't many-places you don't get to visit sooner or later in twenty years.".. in airsickness bags, had been born from the headwaters of the human gene pool, before the river flowed. Thus a quark or lepton was always three components or three anticomponents; mass followed as a consequence of there being no mixing of these within a triplet. Mixed combinations did not exhibit mass, and accounted for the vector particles mediating the basic forces-the gluon, the photon, the massless vector bosons, and the graviton.. "I have to go back inside now to fix things up," Colman said, leading them back toward the gatehouse, where Armley was watching curiously with Jay. "Mike," Colman said to him as they stopped by the door. "Take these two people inside and fix them up with coffee or something, will you. Jay, wait inside with Veronica. I have to get back in with Bret, but I'll be back in a few minutes. Don't worry. It'll be okay.".. Without shame, the mutt squats and urinates on the blacktop.. In addition to the sharp crack of gunfire, Curtis hears lead slugs ricocheting with a whistle or with a a. "We all have to pay our debts," Nanook said unhelpfully.. The communicator at his belt signaled a call from Sirocco, who, with Hanlon and a couple of the others, was taking a break inside the Chironian transporter that had flown from Canaveral. "How's it going?" Sirocco inquired when Colman answered. "Are the troops mutinying yet?".. Two hundred thousand miles away on the rugged, pockmarked surface of Chiron's other moon, Romulus, two enormous covers, whose outer surfaces matched the surrounding terrain, swung slowly aside to uncover the mouth of a two-hundred-foot-diameter shaft extending two miles vertically through the solid rock. The battery of accelerator rings in the chambers surrounding the base of the shaft was already charged with dense antimatter streams circulating at almost the speed of light.. approached Micky. "Do you believe in life after death?".. beaten and left for dead. Her life wouldn't now be a long series of waking dreams and nightmares.. Sinsemilla was highly amused. Words whooped from her on peals of laughter. "It's not poisonous, you.. in the other as she ascended in a pale green levitation beam.. "Mama likes bad boys.".. "I hope so too," Kath said with feeling. "I ought to go now and see them off. Take care, Leon.".. "Think of it like the phase-changes that describe transitions between solids, liquids, and gases," Pernak said. "The gas laws are only valid over a certain limited range. If you try to extrapolate them too far, you get crazy results, such as the volume reducing to zero or something like that. In reality it doesn't happen because the gas turns into a liquid before you get there, and a qualitatively different kind of behavior sets in with its own, new rules.".. "What's your name, boy?" The major thrust his face close and narrowed his eyes menacingly.. he crouches motionless until he is sure that the noise has drawn no one's attention.. There's some kind of trouble at Brigade-something about Portney being kicked out and Wesserman locking up some SDs at gunpoint.".. "Good pup," the boy whispers.. "Neither do I. She opened the cabinet door under the.. He didn't think too much about things like that anymore; his visions of being a great leader and achiever in bringing the Word to Chiron had faded over the years. And instead . . . what? Now that the ship was almost there, he found he had no clear idea of what he wanted to do . . . nothing apart from continuing to live the kind of life that he had long ago settled down to as routine, but in different surroundings.. He wondered how he might have made out if he'd had a start like that. And what would a guy like Colman be doing, who knew more about the Mayflower II's machines than haft the echelon-four shot-noses put together? If that was the way the computers had brought the first kids up, Driscoll reflected, he could think of a few humans who ~

Leilani suggested..as though this were a manic ghost that had no patience for the eerie but tedious pace of a traditional. Marcia Quarrey then raised the question of a separate governor, responsible to Wellesley, but physically based on the surface inside the enclave to administer its affairs. Perhaps the division of authority between the members of the Directorate sitting twenty thousand miles away in the ship had contributed to the difficulties experienced since planetfall, she suggested, and delegating it to one person who had the advantages of being on the spot would remedy a lot of defects. Opinions were in favor, and Quarrey nominated Deputy Director Sterm for the new office. Sterm, however, declined on the grounds that a large part of the job would involve policymaking connected with Terran-Chironian relationships, and since a Liaison Director existed to whom that responsibility was already entrusted, the sensible way to avoid possible conflicts was to unify the two functions, lie therefore nominated Howard Kalens; Quarrey seconded, and the vote was carried by a wide margin..As their speed continues to fall precipitously to fifty, then below forty, under thirty, as the brakes are..footprints where table stone gives way to a swale of soft sand..have been: so free of anger and self-destructive impulses..Although everybody had been expecting the announcement, a tension had been building as the room waited for the words that would confirm the expectations. Now that the words had been said, the tension released itself in a ripple of murmurs accompanied by the rustle of papers, and the creaks of chain as bodies unfolded into easier postures.. Colman closed his eyes for a moment and breathed a long, drawn-out sigh of relief "They made it," he whispered. "They're all in there."..self-assurance, her wit, and her indomitable spirit made it hard to think of her as disabled, even now. At any moment, however, one of them might retreat here to the bedroom. If a search by authorities. "Oh, I was in the Engineer Corps for a while, and I guess I picked a lot up here and there." If she had been with Farnhill's party inside, she was obviously more than just a go-fer. Why in hell did she come out to the parking lot to be nice to the troops?.she devised elaborate acts of revenge on her mother and on Dr. Doom. This night, in spite of what..Jay sat at an empty booth while Colman collected two coffees from the counter, then inserted' his Army pay-card into a slot. In a lot of ways lay reminded Colman of himself when he was a lot younger. Colman had acquired his name from a professional couple who adopted him when he was eleven to provide company for their own son, Don, who was two years older. They hadn't wanted to disrupt their careers by having another child of their own. Colman's stepfather was a thermodynamics engineer involved with heat exchangers in magnetohydrodynamics systems, which accounted for Colman's early interest in technology. Although the Colmans had done their best to treat both boys equally, Steve resented Don's basic schooling and was jealous when Don went to college to study engineering, even though he himself had then been too young to do the 'same. The rebelliousness that" had contributed to Steve's being placed in the home for wayward adolescents from which he had been adopted reappeared, resulting in his giving the couple some hard times, which upon reflection he felt bad about. For some reason that Steve didn't understand, he felt that if he could help Jay realize his potential and use the opportunities he had, it would make up for all that. Why, he didn't know, because nothing he did now could make any difference to the Colmans, who were probably old and gray somewhere, but he felt he owed it to them. People's minds worked like that. Minds could be very strange..Pernak and Jean looked at each other, puzzled. Bernard stared obediently at the picture for a few seconds, then looked at Jay. "It looks like a nicely done painting of mountains," he said. "Is this supposed to have something to do with what we're talking about?". Sterm is playing on that." "I agree," Marcia Quarrey said. She looked at Borftein. "If that's the case, then sending in the SD's would only confirm their fears. It would be the worst thing we could do."..and finished to the color and glimmer of Cabernet..As Leon spoke, Colman looked curiously at Kath to see if he could detect any reaction, but she remained impassive..them around the base later; nobody had seen them at the perimeter; nobody had flown them out; and an intensive search carried on all through the night had failed to locate them anywhere. His tail lowers further, scoffed derisively. "He still thinks it's for playing with." "I'm just telling you what the guy said." "Never say you don't get anything back for your taxes." Colman was sitting next to her, grinning faintly in the brief glow as one of the others lit a cigarette, But she had gone for so much of the day without speaking that she was unable to answer immediately. His hand found her arm in the darkness and squeezed briefly but reassuringly. "It'll be okay," he murmured. "The guy did it!"..apparent cowardice and the alacrity with which he had betrayed his

client confirmed for them that he. "It wasn't like that at all," she said. "Although, I suppose. I shouldn't really say too much since I've had nothing to compare it with. But it was"-she shrugged- "warm, friendly..., with lots of fun and always plenty of interesting things to find out about. I certainly don't miss not having had my head filled with some of the things a lot of Terran children seem to spend their lives trying to untangle themselves from. We got to know and respect each other for what we were good at, and different people became accepted as the leaders for different things. No one person could be an expert in everything, so the notion of a permanent, absolute 'boss,' or whatever you'd call it, never took hold." Jay nodded and pointed to the view of one of Chiron's moons, which was showing between the clouds up near one of the corners. "That's Remus," he said. "The painting was done over a year ago, and if you look at it you can see that whoever painted it paid a lot of attention to detail. I spent a lot of time reading about this star system and its planets, and when I got to looking at Remus in this picture, I realized there was something funny about it." Jay's finger moved closer to indicate a smooth region of Remus's surface, sandwiched between two prominent darker features, probably large craters. "I was sure that in the most recent pictures I'd looked at from the Chironian databank, those two craters are connected by another one, where this unbroken area is . . . a big one, several hundred miles across, When I checked, I found I was right-there's a huge crater right here, and it wasn't there a year ago." of the cowboys who might be ? surely are ? in the vicinity, or into another posse of FBI agents. Ignoring her, the girl plucked a roll of plastic wrap from a counter and began to cover the serving bowls. "You can't control me with a name!" With her deformed hand, Leilani pointed at Micky's untouched serving of pie. "Are you going to eat. motioning Padawski and his group to their feet, the major marched over to where Colman and the others from D Company were standing with the Chironians who had been upstairs with them. He had already taken their names and established that they had not witnessed the incident firsthand. "You guys are free to go," he informed them. "Hi," the paunchy man greeted amiably. "I'm Clem. These are Carla and Hermann, and Francine and Boris. The big guy here is Cromwell, and the little lady up top is Amy. Well, I guess... welcome aboard." "Cut it," Colman grated. "You leave him out of it. If it's me you want, I'll take the three of you, but some other place. He's got nothing to do with this." "They soon find out," Juanita said it as if it explained everything. AT THE TOPOF THE SLOPE, dog and boy? one panting, one gasping? halt and turn to look back. coming in." Leave the house. Sleep in the yard. Let Dr. Doom deal with the mess if there is one. Lechat glanced uneasily in Celia's direction for a moment and then looked back. "Howard Kalens," he said in a lower voice. "Couldn't that have been a final warning? Look at the effect it's having on the Army, except that they don't seem to be reading the right things into it." He looked at Jay. "I can't see that they've got it all figured out. They can't have." regular first name. They're worse about names than old Sinsemilla. They're all Hudson, Lombard, Trevor. What had changed was hope: the hope of change, which had seemed impossible to her only yesterday. She continued to feel ashamed of herself, not because of the dumb joke with the rosebush, but because. GENERAL J STORMBEL did not make mistakes, and he was not accustomed to being held responsible for the mistakes of others; people under him tended to find out early on that they did not make mistakes. Their acceptance of the standards and disciplines that he imposed provided a permanent assertion of his symbolic presence for as far as his sphere of command and influence extended, and served as a constant reminder that his authority was not to be trifled with. Displays of laxness represented an acknowledgment that was less than total, and signified lapses of mindfulness of the omnipresence that his authority projected-as if people were beginning to forget that what he said mattered. Stormbel didn't like that. He didn't like people acting as if he didn't matter. Bernard's eyes widened incredulously. "But if the Kuan-yin isn't finished, then what made the crater in Remus?" Jay shrugged. "All the things crazy people usually follow crazy leaders for, I guess." Although it seemed unrelated to Leilani Klonk, Micky recalled something that her aunt Geneva had said. fierce animosity now reappears like a gray winter beach from beneath an ebbing tide. "Maybe," Leilani continued, "you think that would be interesting conversation, even if sort of gross, but a rose?" "Absolutely. I don't have enough of it anymore." becoming too much like a dog, wild and given to rash action. He had been observing for perhaps five minutes when a door farther along the platform opened, and a figure came out clad in the same style of suit as the engineers below were wearing. The figure approached the ladder near-where Colman was standing and turned to descend, pausing for a second to look at Colman curiously. The nametag on the breast pocket read 'B. FALLOWS. Colman raised a hand in a signal of recognition and flipped his radio to local frequency. "Hey, Bernard, it's me--Steve Colman. I don't know if you're heard yet, but that' transfer didn't go through. The other members of Red section in the row of seats to the left of him and those of Blue section sitting with Hanlon and Sirocco in the row ahead were strangely silent as they watched the screen where the bright half-disk of Chiron hung in the background: the first real-time view of a planet that some of them had ever seen. Farther back along the cabin, reflecting the planned order of emergence, General Portney was sitting in the center of a group of brass-bedecked senior officers, and behind them Amery Farnhill was tense and dry-lipped among his retinue of civilian diplomatic staff and assistants. In the rear, the SD troops were grim and silent in steel helmets and combat uniforms festooned with grenades,
