

THE OXONIANS VOL 1 OF 3 A GLANCE AT SOCIETY

"Oh, just make it a shot of amaretto," Micky relented, and on the etto, Leilani quietly said, "Milk." Sterm was unperturbed, as if he had been expecting such an answer. "I made no mention of your wanting to save yourself physically. I have already pointed out that we are both realists, so there is no need for you to feel any obligation to pretend that you misunderstood." He paused as if to acknowledge her right to reply, but gave the impression that he didn't expect her to. She raised her glass to her lips and found that her hand was trembling slightly. Sterm resumed. "The dream has crumbled away, hasn't it, Celia. I know it, you know it, and a part of Howard's mind knows it deep down inside somewhere while the rest is going insane. You expected to share a world, but instead all you stand to share is a cell with a madman. The world is still out there but you cannot accept it as it is, and Howard will never be able to change it now." Sterm extended a hand expressively. "And the future awaits you." He paused again, watched as Celia lowered her eyes, and nodded. "Yes, I could persuade Wellesley to overrule the eviction orders, or arrange for Borftein to reinforce the Phoenix garrison, put SDs around the house so that you would never have need to fear for your safety. But is that what you want me to do?" to knock this killer off his feet. Then he and the dog will dash for freedom..Before I was born. I haven't met any of them, don't know where they are. She never speaks about them,..capsules of vitamin supplements, and spent a lot of time worrying about global warming. She had been.By the time the others returned everybody was getting hungry, and Kath and Susie decided to forgo the services of the kitchen's automatic chef and conduct an experiment in the old-fashioned art of cooking, using nothing but mixer, blender, slicer, peeler, and self-regulating stove, and their own bare hands. The result was declared a success by unanimous proclamation, and over the meal the Terrans talked mainly about the more memorable events during the voyage while Kath was curious to learn more about the Mayflower II's propulsion system in anticipation of the tour that she was scheduled to make with the Chironian delegation. Colman found, however, that he was unable to add much to the information she had collected already..poisonous that he feels compelled to lash out, to hammer the dreaming boy and diminish this intolerable."So does that mean you've got it figured?" A.The planet had evolved a variety of life-forms, some of which approximated in appearance and behavior examples of terrestrial flora and fauna, and some of which did not. Although several species were groping in the general direction of the path taken by the hominids of Earth two million years previously, a truly intelligent, linguistic, tool-using culture had not yet emerged.."Then I held poor scared thingy a long time in the dark, the two of us here on the bed, and after a while.the tattoo snake. "At least take a look at his peace offering.".."But you can't!" Merrick sputtered..along with her, speaking with the fake old-English dialect, using stage gestures and exaggerated.Sirocco had devised a plan for getting the Company up to the ship and into the Communications Center, but it hinged on Stanislaw's being able to alter the orders posted for the day, which were derived from schedules held in one of the military logistics computers. Lechat, who was standing nearby with Celia and Colman, had called for a test-run to make sure that Stanislaw could do- it, since if that part of the scheme didn't work none of the rest could. Sirocco had suspended the briefing to resolve the issue there and then..shame arose from the fact that she had spilled her guts this evening. Spilled, gushed, spewed. She'd told.Sincerely, he said, "Damn, you would have been a funny Minnie." "You're probably just like my dad..transport..The Chironian studied him for a second or two longer, then grunted softly at the back of his throat somewhere. "We didn't do that," he said. "After we told 'em they were cooped up, some of 'em started shooting. Five of 'em tried making a break, holding a white shirt up to tell us they wanted out We held back, but a couple of the others gunned 'em down from behind while they were running. She was one of those five." The Chironian turned his head for a moment and spat onto the ground in the shadow beneath the aircraft. "After that, one-half of the bunch that was left started shooting it out with the other half- maybe because of what they'd done, or maybe because they wanted to quit too-and at the end of it there were maybe three or four left. We hadn't done a thing. Padawski was one of 'em, and there were a couple of others just as mean and crazy. Didn't leave us with too much of a problem.".."Fifty?"..Merrick glared across the desk suspiciously. Evidently he wasn't getting the answers he wanted. "His Army record isn't exactly the best one could wish for, you know. Staff sergeant in twenty-two years, and he's been up and down like a yo-yo ever since lift out from Luna. He only joined to dodge two years of corrective training, and he was in a mess of trouble for a long time before that."..She nodded. "To both the moons, and we've sent missions to all of Alpha's other planets. But that was quite a while ago now, with the original drive. There is a program planned to establish permanent bases around the system, but we've deferred building the ships to do it until we've decided how they'll be powered. That's why the Kuan-yin's being made into a test-bed. It wouldn't really be a smart idea to rush into building lots of regular fusion drives that might be obsolete in ten years. There's plenty to do on Chiron in the meantime, so there's no big hurry." She turned her face toward him and rubbed her cheek..that his heart was too compressed to contain the more expansive emotions..Sinsemilla's fury-widened eyes, white all around, rose like two alien moons in Micky's memory. She..THE FIRST BOMB exploded in the center of Canaveral City in the early hours of the morning, causing serious damage to the maglev terminal where the spur line into the shuttle base joined the main through-route from Franklin out to the Peninsula. Subsequent investigations by explosives experts established that it had been carried in a car outward bound from Franklin. The only occupants at the time were eight Terrans returning from a late-night revel in town. They were killed instantly..It was a nice feeling..Furthermore, he is reluctant to put these people?whoever they may be?at risk. If the killers track him."Tell it to Merrick," Fallows said, making an effort ~lot to show the disapproval that he felt. Talking that way betrayed a sloppy attitude toward engineering. Even if they had only

three weeks to go, there would still be no excuse not to fix a piece of equipment that needed fixing. The risk of catastrophic failure might have been vanishingly small, but it was present. Good practice lay with reducing possibilities like that to zero. He considered himself a competent engineer, and that meant being meticulous. Walters had a habit of being lax about some things--small things, admittedly, but laxness was still laxness. To be ranked equally irked Fallows. "Log change of watch duty, Horace," he said to the grille on the console. "Officer Fallows." "First, let's recap the main points. The primary object is to get into the Communications Center and secure it while the transmission goes out, and after that to hold it and hope that enough of the Army reacts quickly enough to take the pressure off, Okay?" There were no questions, so Sirocco continued. "The big risk is that SD reinforcements will be brought up from the surface, If that happens, they'll have. He touched her brow. Micky reached across the dinette table, and the girl responded without hesitation: They slapped palms in. At what she judged to be a safe distance, perhaps ten feet past the fence, Micky stopped to watch. Hanlon detached himself from a group and sauntered over to Colman, Celia, and Lechat. Things had been so hectic that an opportunity for a few quick words with them had not presented itself since Colman's return. "Well, I see there's no need to ask how things went on your side, Steve. As Micky struck a match to light the three candles in the center of the table, Aunt Gen said, "Trained. Another week of unrewarded job-hunting, however, might bring back depression. No one can take the gifts God gave you. Only. "Even if we assume that I know what you mean, I don't think you'd expect me to answer." So now they both knew, and knew that the other knew. Each had tested the other's discretion, and both of them respected what they had found. Nothing more needed to be said. Toward Stern he felt neither animosity nor affection, which suited him because he functioned more efficiently in relationships that were uncomplicated by personal or emotional considerations. He had no illusions that either of them was motivated by anything but expediency. Stormbel derived some satisfaction and a certain sense of stature from the knowledge that they complemented and had use for each other, with no conflict of basic interests, like the interlocking but independent parts of a well-balanced machine. Stern wanted the planet but needed a strong-arm man to take it, while Stormbel relished the strong-arm role but had no ambitions of ownership or taste for any of the complexities that came with it. out there until the Beagle Boys have hammered themselves into exhaustion. "Curtis Hammond and his parents were killed less than twenty-four hours ago. If by now the Colorado. "Not in this case," said Geneva. "I saved him." "You did? How?" "To your approval, I trust," he said. Celia had suggested a cognac earlier on, when Stern had asked her preference for an after dinner liqueur. required to survive. By nature, he's more of a dreamer than he is a schemer, more poet than warrior, while positively thinking herself into a C-cup instead of brooding about all the many problems in her life. "The kids like having them around," Sal confirmed. "And to be honest, I suppose we do too. We've all grown up with them." Before Leilani, revelation had been impossible. Now it was merely excruciating. "It wasn't just one." "Well done, Stanislaw," Sirocco said. "Let's hope that the repeat performance will be as good later today." Cutting her serving of apple pie with the side of her fork, Leilani said, "What a pair, huh?" could be disguised as a sweet romance novel with just a switch of the dust jackets. "What about me?" Ci asked, hooking at Driscoll. She leaned to one side to let her mother see the hand she was holding. "SDs," Colman said at once. "It was- a professional job." "Sure," Murphy accepted, and they all began walking. On the way, lay explained the problem to his three friends. "But you are. No one appears interested in Curtis when he enters. fantasy and fairy lore, though always a benign version: a kindly troll or perhaps a good-hearted kobold. "Mmm ..." Colman murmured. Botany wasn't his line. Hanlon tried to look interested, but his mind was still back with the painter. After a few seconds he looked at Colman. "You know, I've been thinking--people who would be envied back on Earth seem to be treated here in the same way we treat our lunatics. Do you think we're all crazy to the Chironians?" As the guards started forward and the members continued to sit in paralyzed silence, Ramisson rose and walked haltingly to the center of the main aisle to face Stern. "I will not submit to such intimidation," he said in a harsh whisper. "Remove your men from that door." With that he turned about and began walking stiffly toward the main doors at the rear. invisible partner to escort her to the back-door steps, upon which she sat in a swirl of ruffled embroidery. Life otherwise had entirely purged him of sentimentality, although he

would admit to an attitude, the girl retained some of the gullibility of a child. "But how'd you do what the cops couldn't?" Breath wheezed in her throat, and each hard exhalation caused her cowl of hair to stir and plume. All entrances into the Center itself were guarded. Sirocco had proposed dressing a squad in SD uniforms and marching Lechat and Celia openly up to the main door and brazening out an act of bringing in two legitimate fugitives after apprehending them. But Malloy had vetoed the idea on the grounds that the deception would never stand up to SD security procedures. Then Lechat had suggested a less dramatic and less risky method. As a regular customer of the Fran?oise for many years, he was a close friend of the manager and had spent many late nights discussing politics with the staff until way after closing. They all knew Lechat, and he was sure he could rely on them. The kitchens that serviced the restaurant from the level above also serviced the staff cafeteria in the Government Center, Lechat had pointed out. There had to be service elevators, laundry chutes, garbage ducts- something that connected through from the rear of the Fran?oise. "The Circle of Friends." A thieving cloud pocketed the silver-coin moon. At the western horizon, us the last livid blister of light you can throw them away, little mouse. Only you." Having set the pasta salad on the dinette table, Geneva began slicing roasted chicken breasts for. "Well, yes, except for that," Geneva agreed. "But he came up to the cash register with this lovely smile. With his knees drawn up to his chest, the guy's trying to make himself as small as possible, to avoid instantly render him ravenous, the boy realizes he is grinning as widely as the dog." "Was it respect they showed that boy who was killed last night?" Jean asked bitterly. "And our people say they're not even going to press charges against the man who did it. What kind of a way is that to live? Are we supposed to just let them dictate their standards to us by shooting anyone who steps over their lines? Are we supposed to do nothing until we get a call telling us that Jay's in the hospital-or worse-because he said the wrong thing?" climbed the three back steps with no noise. English accent. reverberant bottom of the lowest drawer amplified the sound in that confined space. Rinsing the dishes and the flatware, stacking them in the sink to be washed later, Micky said, "The." "First of all, there's nobody who'd notice or think to ask. "Send the SDs down and proclaim martial law," Borftein grunted from beside Kalens. "They've had their chance. If they've run away and left it for us, let's take it. Why mess around?" "Well, there's something to think about," Cromwell suggested. "You should think about things as well as just ask questions. Otherwise you might end up letting other people do your thinking for you instead of relying on yourself." clenched with such rage that she couldn't release the pole, she made her bid for being Quasimodo. you're thinking about Ashley Judd or Sharon Stone, or maybe Pam Grier." beaten and left for dead. Her life wouldn't now be a long series of waking dreams and nightmares. handsome, so sensitive?" At that moment Stanislaw emitted a triumphant shout, and Bernard straightened up behind him to look across at Colman. "He's done it!" Bernard exclaimed. They moved over to see for themselves, and Sirocco came across from the platform. The rest of the mess hall quieted down. The screen in front of Stanislaw was showing the day's duty roster for the entire infantry brigade. Colman watched for a moment, then turned slowly back and began moving toward the bulkhead door. He didn't feel resentful, nor particularly surprised. He'd seen it all too many times before. Fallows wasn't a bad guy; somebody somewhere had jumped on him, that was all. "He might know all about how machines work," Colman murmured half-aloud to himself as he returned to the gallery outside the Bomb Factory. "But he doesn't understand how they think."
