In these cases, an egg cell, containing only a half set of chromosomes, does not require union with a sperm cell to supply the other half set. Instead, the egg cell's half set merely duplicates itself, producing a full set, all from the female parent, and the egg then proceeds to divide and become an independent organism, again a kind of clone. . . .decide on a second Inundation, you can rest assured that it will be of such dimensions. You are covered with bark dust, scratched by twigs, sweaty and hot. A wind sighs in the aspen leaves. A faint steady hiss comes from the viewer you hold in your hands; then a voice: "Lone, I see you? under the bam, eating an apple!" A silence. "Lone, come on out, I see you." Another voice. "That's right, she's in there." After a moment, sulkily: "Oh, okay." All evening I'd dreaded having to face Debbie with the bad news. But when I looked in the bedroom, she was sound asleep. I got out of bed and headed for the bathroom. "That's suspicious in itself." A similar case is that of H. G. Wells's *The Island of Dr. Moreau*, filmed with superbly demonic. He certainly had a right to say that, but there was no self-pity, just an observation. A tremor of heartfelt emotion colored her lovely contralto voice as she said, "Oh Jesus, what am I going to do? I can't take any more! I am just so ... so goddamned wretched! I'd like to kill myself. No, that isn't true. I'm confused, Larry. But I know one thing? I am an angry woman and Fra going to start fighting back!" . . . the light they could not see the ceiling or the far wall. He had seen the tiny whirlibirds weaving the suits, and the other ones, like small slugs, eating them away when the colonists saw they wouldn't need them. Is it the plants themselves that did this., "How did you get here?" asked Jack. . . . pointed to the trunk. From it came a low, muggy sound: Ulmphf. . . . where we can and adapt it to us where we can. For that, we're better oft than most of the colonists of the past, at least for the short term. We have a large supply of everything a colony needs: food, water, tools, raw materials, energy, brains, and women. Without these things, no colony has much of a chance. All we lack is a regular resupply from the home country, but a really good group of colonists can get along without that. What do you say? The MacKinnons introduced themselves. His name was Jason. Hers was Michelle. They lived quite nearby, on West 28th, and were interested, primarily, in the television shows they'd seen when they were growing up, about which they were very well-informed. Despite a bad first impression, due to his associating them with Maggie of the green sofa, Barry found himself liking the MacKinnons enormously, and before the next switchover he put his chair in the LOCK position. They spent the rest of the evening together, exchanging nostalgic tidbits over coffee and slices of Partyland's famous pineapple pie. At closing time he asked if they would either consider giving him an endorsement. They said they would have, having thoroughly enjoyed his company, but unfortunately they'd both used up their quota for that year. They seemed genuinely sorry, but he felt it had been a mistake to ask. "But how did the remains get so far below ground?" Ralston asked. "You'd expect them to be high up. The winds couldn't bury them that deep in only twelve thousand years." . . . All in all, I didn't find anything. Except for the books and the deck of cards, there was
